Incineration - Carcass Disposal

Incineration is an effective but more costly method. It is a good cold weather alternative to burial.

Requirements:

1. Carcass must be incinerated in a PCA-approved incinerator. ([MN Rule 7011.1215](#))
2. Ash and gas emissions from the incinerator must not exceed pollution standards.

Advantages

- Can be performed year-round
- Low biosecurity risk

Disadvantages

- Expensive
- Causes odor
